

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

OPEN LETTERS.

A TROPICAL LABORATORY.

To the Editors of the Botanical Gazette:—The recent editorial in the GAZETTE concerning the establishment of a laboratory in the tropics, in the opinion of the writer, calls attention both to the most pressing needs of American botany, and to the most important means of advancement and preservation of the integrity of the science in general. Previously to the appearance of your editorial I had sent to press in the *Popular Science Monthly* an article in which I had touched upon this point. Partial notes upon several problems, the solution of which may only be accomplished in the tropics, have accumulated in my laboratory, and an expedition to the West Indies in the summer of 1897 has been planned for the purpose of beginning work and selecting a suitable locality for its annual continuance. Necessarily temporary quarters would have been secured each year. I would welcome the establishment of a permanent tropical laboratory open to students during the entire year and free from the inconvenience of temporary facilities, to say nothing of the manifold advantages afforded by such an institution in the matter of equipment and accessibility of material.

I would gladly put aside plans already formed and cooperate in any effort leading to the organization and selection of a locality for a laboratory of this character, or aid in any movement leading to its establishment.—D. T. MACDOUGAL, *State University of Minnesota*.

THE BUITENZORG GARDENS.

To the Editors of the Botanical Gazette:—The following excerpts from a letter recently received from Mr. David G. Fairchild, who is making some special studies at the Botanic Gardens, Buitenzorg, Java, may be of interest to the readers of the GAZETTE:

“Dr. Treub, the director of the gardens, is taking steps to establish an international affair here, similar to that at Naples, except that the whole expense of running such a place will be borne by the Dutch government. I am anxious to see a table here and hope when I return to get assistance in bringing this about. What is needed is a yearly or bi-yearly grant which will enable a botanist or zoologist to spend six or eight months at the gardens. Tickets are now sold from Hong Kong to New York for forty-five pounds
